General Do not leave affected person unattended. Remove victim out of the danger area. Keep affected person warm, still and covered. Take off immediately all contaminated clothing. In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness place person in the recovery position. Never give anything by mouth.

Inhalation If breathing is irregular or stopped, immediately seek medical assistance and start first aid actions. Provide fresh air.

Skin contact Wash with plenty of soap and water.

Eye contact Remove contact lenses, if present and easy to do. Continue rinsing. Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart.

Ingestion Rinse mouth with water (only if the person is conscious). Do NOT induce vomiting.

Most important symptoms and effects, both acute and delayed Symptoms and effects are not known to date.

Indication of any immediate medical attention and special treatment needed None

5. Firefighting measures

Extinguishing media	<i>Suitable extinguishing media:</i> Water spray, Alcohol resistant foam, BC-powder, Carbon dioxide (CO ₂) <i>Unsuitable extinguishing media:</i> Water jet
Special hazards arising from the substance	In case of insufficient ventilation and/or in use, may form flammable/explosive vapor-air mixture. Solvent vapors are heavier than air and may spread along floors. Places which are not ventilated, e.g., unventilated below ground level areas such as trenches, conduits and shafts, are particularly prone to the presence of flammable substances or mixtures.
<i>Hazardous combustion products</i>	Nitrogen oxides (NO _x), Carbon monoxide (CO), Carbon dioxide (CO ₂)
Advice for firefighters	In case of fire and/or explosion do not breathe fumes. Coordinate firefighting measures to the fire surroundings. Do not allow firefighting water to enter drains or water courses. Collect contaminated firefighting water separately. Fight fire with normal precautions from a reasonable distance.

6. Accidental release measures

Personal precautions	<i>For non-emergency personnel:</i> Remove persons to safety. <i>For emergency responders:</i> Wear breathing apparatus if exposed to vapors/dust/spray/gases.
Environmental precautions	Keep away from drains, surface and ground water. Retain contaminated washing water and dispose of it.
Methods for containment and cleaning up	<i>Advice on how to contain a spill:</i> Covering of drains <i>Advice on how to clean up a spill:</i> Wipe up with absorbent material (e.g. cloth, fleece). Collect spillage: sawdust, kieselguhr (diatomite), sand, universal binder <i>Appropriate containment techniques:</i> Use of adsorbent materials. <i>Other information relating to spills and releases:</i> Place in appropriate containers for disposal. Ventilate affected area.

see section 10. Disposal considerations: see section 13.

7. Handling and storage

Handling

Recommendations

- Measures to prevent fire as well as aerosol and dust generation: Use local and general ventilation. Avoidance of ignition sources. Keep away from sources of ignition - No smoking. Take precautionary measures against static discharge. Use only in well-ventilated areas. Due to danger of explosion, prevent leakage of vapors into cellars, flues and ditches. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting/equipment. Use only non-sparking tools.
- Specific notes/details: Places which are not ventilated, e.g. unventilated below ground level areas such as trenches, conduits and shafts, are particularly prone to the presence of flammable substances or mixtures. Vapors are heavier than air, spread along floors and form explosive mixtures with air. Vapors may form explosive mixtures with air.

Advice on general occupational hygiene

Wash hands after use. Do not eat, drink and smoke in work areas. Remove contaminated clothing and protective equipment before entering eating areas. Never keep food or drink in the vicinity of chemicals. Never place chemicals in containers that are normally used for food or drink. Keep away from food, drink and animal feeding stuffs.

Storage

Managing of associated risks

- Explosive atmospheres: Keep container tightly closed and in a well-ventilated place. Use local and general ventilation. Keep cool. Protect from sunlight.
- Flammability hazards: Keep away from sources of ignition - No smoking. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Take precautionary measures against static discharge. Protect from sunlight.

Control of effects

- Protect from sunlight. Protect from moisture.
Protect against external exposure, such as Frost
- Ventilation requirements: Use local and general ventilation. Ground/bond container and receiving equipment.
 - Packaging compatibilities: Only packaging which are approved (e.g. acc. to ADR) may be used.

Specific end use(s)

See section 16 for a general overview.

Exposure controls

Appropriate engineering controls: General ventilation.

Individual protection measures (personal protective equipment) Eye/face protection: Wear eye/face protection.

Skin protection

- Hand protection

Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374. Check leak-tightness/impermeability prior to use. In the case of wanting

to use the gloves again, clean them before taking off and air them well. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.

- Other protection measures

Take recovery periods for skin regeneration. Preventive skin protection (barrier creams/ointments) is recommended.

Wash hands thoroughly after handling.

Respiratory protection

In case of inadequate ventilation wear respiratory protection.

Environmental exposure controls

Use appropriate container to avoid environmental contamination. Keep away from drains, surface and ground water.
